Your Declarant further requests that officers executing this warrant be excused from the immediate receipt requirement of N.D.R. Crim. P. 41(d). Notifying the vehicle's owner or custodian that a warrant was executed to install a tracking device in the vehicle will alert the owner/custodian to law enforcement's ongoing investigation and prompt the person to locate and remove the tracking device or to move or destroy any contraband from related premises before a subsequent warrant can be obtained and executed.

Your Declarant believes that the information contained in both the application and warrant would serve to alert the owner/custodian to law enforcement's ongoing investigation and prompt the person to locate and remove the tracking device or to move or destroy any contraband from related premises before a subsequent warrant can be obtained and executed. Consequently, Your Declarant further requests both the application and warrant be sealed pending any further orders of the court pursuant to N.D.C.C. §.

Your Declarant is further requesting that the return required be made without unnecessary delay following the expiration of the 60-day period. Moreover, I am respectfully requesting that such return take the form of a printout (or contained on a CD) of the GPS device data or any other manner prescribed by this court, and that said return shall remain under the seal of this Court until further Order of this Court.

Your Declarant is further requesting exception from the normal knock and notice requirement of N.D.R. C.C. § 29-29-08. Knock and notice is required to alert occupants of premises to the presence and imminent entry of law enforcement. The purpose of the knock and notice has two reasons: privacy and safety; to avoid interrupting the private and personal functions of the occupants in their premises and to protect both the occupants and police from the use of deadly force in the event the occupants believed their premises were being invaded by robbers or other attackers as opposed to the authorized entry of police. Neither privacy nor safety is at issue here. Only a vehicle, which the U.S. Supreme Court has recognized as having a lesser expectation of privacy than a residence, will be involved.

For this investigation, the tracking device requires exterior installation and will collect the following information: time and date of the vehicle's location and travel route in real time (live track). Your Declarant also requests authorization to monitor the tracking device for the limited purpose of tracking the vehicle's location and for gathering evidence which constitutes evidence of offenses in violation of N.D.C.C. § 19-03, specifically manufacturing, possession, and delivery of controlled substances.
